## DEVELOPER'S COMMENTS

We started developing this game based on a few simple ideas: "Let's make a 3D game," and "Can we portray the stories and world we've imagined as a video game?"

And finally, the game is here.

We hope you have a wonderful experience traversing this strange world and unraveling the story, as well as taking a deeper look into concepts such as purity, ugliness, joy, and anxiety - some of the complex and constantly moving parts that make up the human psyche.

Completely stunned me. What a gem in the walking simulator segment.. It has got the look and feel of a really low budget exploring game. There is a lot of mouse clicking because every examine action requires you to click an extra time in order to be able to move on. After 30 minutes of gameplay I was running around in a hospital/asylum and nothing interesting happened at all, just examining shelves with medicine and bandages. Hands down this game is one of the boring ones I've come across.. So CINERIS SOMNIA is a rather interesting game, it wears many masks not all of which I have uncovered as of yet, if you like mostly text based story and some dialogue all of which is both interesting and set in an ever changing and interesting world/s then I highly suggest this game, it's clever in it's subtlety, the story and possible concept is truly interesting and there are multiple ending's, I have the normal one so far, I will have to see what more it has to offer but as it stands I say buy buy buy dood. I bought this game because the piano in the trailer touched my heart, I hope its story is the same.. Good story with awesome soundtrack.. JUST OPHELIA.. Full review: <http://wamsoon.com/index.php/2018/10/17/somina-cineris/> Can't say I recommend it 100% but I kinda dig it. 9/10 so far so good only the main character emo tall guy sasuke look a like needs a cool voice acting DEVS if you read this please add cool voice acting for the main character adn also please put in the map where the main character is at like GTA and other gmaes that specifies where your characters at it gave me a lot of damage "that's a lot of damage" to my brain and eyes playing for hours looking where my character in the map at :D just kidding this good game needs a sequel. Now first guys I will give you a hint dont pick the black butterfly first or you'll regret it. First I thought this isn't a horror f@%ing game cause it became so crazy when I pick the black butterfly all you need to do is dont get hit and killed or you'll wake up and never finish that story tips always save the game and load it whenever you wake up. Gameplay mechanics is good like your character interacts with things and people other than that it lacks speech where the main emo tall guy sasuke look alike or eren look a like lacks speech Devs please add cool voice acting speech of the main character when he interacts with people and stuff not just some subtitles. Now about the game: It is a series of events where you solve errands of girls, first pick the gold butterfly, next is the blue and last but not the least the black one or else you'll end up like me with a heart pulsating over 9000 such an insane mode for this game requires a lot of knowledge memorising places and where to hide in them such thrilling event in the game just dont get hit or else you'll wake up and regret you will never finish the rich girl's story. I never finish it yet but I'm almost done with the black butterfly, while the blue butterfly seems peaceful but i'll try to now if it is, because it is a mystery game after all. So thank you so much everbody for watching and as always I will see you in the next vi... joke ahahahaha I'm not mark just some random dude I hope Markiplier plays it. And also the main character indeed was the black angel. :D
